

Laser Tattoo Removal Price Guide

Laser Tattoo Removal will require anything from 4 treatments (tattoo reduction) to 8-12 treatments (tattoo removal). Please note that the etching made in the skin when creating a tattoo will leave faint scar tissue which is not removable and can often leave a faint outline of the existing tattoo in place.

Laser Tattoo Removal is not effective on light blue, light green or sunset colours.

Laser Tattoo Removal

A8 (postage stamp) \$125

A7 (credit card) \$175

A6 (postcard) \$250

A5 (1/2 piece of A4 paper) \$450

PLEASE USE THE SPECIFIED POST CARE CREAM WE RECOMMEND.

You can pre-purchase Stratamed or Strataderm from your pharmacy prior to your appointment or purchase our tattoo TR Pro+ 10g cream for \$50, whilst in the clinic. Do not use Paw Paw or Bepanthen cream as it traps the heat of treatment and can cause burns.

Ensure you can wear loose or non-friction clothing over the treated area for 5 days.
You must not expose the treated area to sunlight for 2 weeks following treatment.

Next steps

All laser treatments are conducted in our Newcastle clinic. Book your complimentary consultation with one of our Registered Nurses to obtain a personalised treatment plan.
